and have been metricated by some manufacturers.

Drawings of National Bee Hive Component Parts
If you choose the simpler rabbet option, you need to cut a $3/4$ inch wide by $3/8$ inch deep rabbet along each corner of the short sides of the hive bodies and the short sides of the medium super. Also, you need to cut the long sides of the hive bodies and mediums to $19-1/8$ inch when using the rabbet option (rather than the $19-7/8$ inch length when using the finger joint option).
