BOGE S series screw compressor, including its additional equipment, is exclusively intended for the compression of air. The air taken in must not contain any explosive or chemically instable gases or vapours. Do not exceed the specified final compression temperature. BOGE screw compressors are designed for stationary operation.

Operating instructions  
The BOGE C series is a trendsetter in its class: less noise, less pipework, less connections in contrast to more output, more individual configuration possibilities and more efficiency and requiring a minimum of space only. We have listened closely to the wishes of our customers – with the C series we provide the air to work.

At BOGE, we were among the first to recognise this problem – and solve it. Highly efficient compressor controls Master controls for multiple compressor stations make compressed air production significantly more efficient – especially in cases where compressed air consumption fluctuates or where speed-regulated compressors are integrated into the network.

BOGE Compressors | Controls  
Planning data / BIM A belt-driven compressor with integrated frequency control for optimum efficiency: as your compressed air requirements decrease, the energy consumption of the compressors decreases, idle times are minimised and pressure fluctuations are levelled off. Smooth starts and stops protect the materials and extend the lifespan.
