## ~~DATA COMMUNICATIONS AND NETWORKING~~

A network is a set of  
devices (often referred to  
as nodes) connected by  
communication links. Or a  
network is simply two or  
more computers that are  
linked together.

the data signal from one point to another. 5. A large community support provides by computer network and extensive documentation libraries.

## ~~Difference Between Computer Network and Data Communication ...~~

Switching techniques are used for transmitting data across networks. Different types are :

1. Circuit Switching: In the Circuit Switching technique, first, the complete end-to-end transmission path between the source and the destination computers is established and then the message is transmitted

# Read Online Data Communication And

through the path. The main advantage of this technique is guaranteed delivery of the message.

~~Data Communication and  
Networking — Short Notes — 1  
— EXAMRADAR~~

Data communications (DC) is the process of using computing and communication technologies to transfer data from one place to another, or between participating parties. DC enables the movement of electronic or digital data between two or more network nodes, regardless of geographical location, technological medium or data contents.
